

Connor's story

Connor received a bike from the Society of St James as part of the Saints4Sport project. Here he tells us about the positive impact the bike has had on his life.

“The bike has given me freedom and with it a new lease of life, I am more able than ever to get around to my appointments and to make the changes I need in order to improve my life. I am starting a course next week and I will be accessing this by traveling with my bike, the future job I will get after the course is on site and this will involve travelling and the bike will aid me in this. The bike has made a real positive influence in my life and I am extremely grateful to the society of St James and those that helped me”.
